 Send to Thomas Register**Thomas Register's Free Company Listings**

All Free Company Listing requests are reviewed by the Thomas Register Editorial Department, and must meet standards and criteria that are proprietary and which are not disclosed. The process of verifying, editing, and uploading listings that are accepted for publication can take up to six months. Due to the volume of requests received, we regret that it is not possible to notify applicants of either acceptance or rejection.

In order to expedite and facilitate processing of their request, applicants are requested and advised to answer as many questions on the form as possible, and as completely and thoughtfully as possible, leaving blank only those questions not pertinent to the nature and scope of their company's activities.

Page 7

All information supplied for publication is subject to editing, and may be published on the Internet, in book form, on CD-ROM, or in any other medium or format deemed appropriate by Thomas Publishing Company.

The Publisher of Thomas Register makes no representation that it is absolutely accurate or complete. Errors and omissions - typographical, clerical, and otherwise - sometimes occur, and this possibility exists in respect to anything published therein. Hence, nothing therein should be relied upon in any direction resulting from any publication, statement, error or omission.

**Thomas Register CAD CD-ROMs** in partnership with Autodesk

Thomas Register and Autodesk have partnered to produce and publish three **FREE** CD-ROM libraries of CAD drawings and technical data. PartSpec, contains millions of parts and is an essential tool for mechanical and electrical engineers and designers. PlantSpec contains CAD drawings of parts and technical information for use by plant designers, engineers, and facilities management. CADBlocks provides drawings and technical data for thousands of building products from top manufacturers, for architects or facilities engineers.

To receive your free Thomas Register CAD CD-ROM's you must reside in the United States, Canada, Mexico, Central or South America.

**FREE - CLICK HERE**

Cut time from your design cycle with drawings and data for millions of mechanical parts. PartSpec is a **FREE** technical tool that allows you to tap into a rich database of parts from the world's best-known manufacturers that can be inserted into your AutoCAD session. Each part includes attributes (vendor, part number, scale and view) that are retained by the drawing after insertion. All PartSpec data is accurate and verified by the manufacturer so you can be sure you are working with the most current and accurate data. All drawings are industry standard .DWG, .DXF, and .SAT format. PartSpec is the largest source for manufacturer specified 2D and 3D CAD files.

**FREE - CLICK HERE**

More Information

If you don't have time to redraw plant components or search through outdated catalogs for product attributes, you need the **FREE** parts library in PlantSpec. PlantSpec contains thousands of pre-drawn, accurate plant design components. And since attribute information (vendor, part number, scale, and view) remains attached to the drawing block after insertion, you can retrieve complete product specifications from your CAD drawing. All drawings are in industry standard .DWG, .DXF, and .SAT format. PlantSpec is the largest library of 2D drawings and 3D solid models that exist for plant design.

**FREE - CLICK HERE**

More Information

Why redraw products, retype specs when you can build your drawings with CADBlocks? Now there's a **FREE** single source for standard drawings and technical data for thousands of building products. CADBlocks is searchable by manufacturer, model number, part number, or CSI Division. All CADBlocks technical content is supplied and verified by the product manufacturers, so you know you're working with the latest, most accurate information. CADBlocks drawings conform to industry-standard .DWG and .DXF formats ensuring consistent layers, scale, dimensions, and units. And all attributes remain attached to the .DWG block after insertion.

**Thomas Register Expands B2B Online Purchasing Capabilities With  
Introduction of Advanced Order Online**

*Web-based Solution Provides Custom E-Catalog, E-Commerce Distribution Model  
and Real-Time Level 3 Data*

**New York, NY, March 13, 2000** -- Thomas Register publisher of the leading online, CD-ROM and print guide for sourcing and purchasing industrial products and services, today announced that it has introduced Advanced Order Online technology, available on Thomas Register Online, the company's e-commerce enabled web site ([www.thomasregister.com](http://www.thomasregister.com)).

Purchasers will find a simplified buying process on Thomas Register Advanced Order Online. Buyers can obtain detailed product information, send RFQS to manufacturers to identify the best price available and conduct price negotiation online. Buyers link directly to manufacturers who can respond to RFQs. Orders are placed directly and the advertiser provides acknowledgement of the order and shipping notification as available. The transaction can be completed through Thomas Register via real-time credit card and purchase card processing.

"We have effectively streamlined the B2B buying process – from an initial RFQ to real-time credit card processing," said Susan Orr, director of Internet marketing at Thomas Register. "Advanced Order Online allows customers to locate new sources of supply and send multiple RFQs and negotiate price, affording the purchaser increased control over spending. This greatly benefits Thomas Register users seeking to save time and money by conducting their purchasing operations over the Internet."

Advanced Order Online aids suppliers as well, enabling them to receive and manage orders and RFQs, maintain up-to-date product information and process payments online through participation in Thomas Register's B2B e-commerce solution. Advertisers can also develop and maintain custom catalogs.

"In their branding efforts, our advertisers needed to have a customized e-commerce solution that looked like their own web sites," said Monica Lavin, director of electronic commerce services at Thomas Register. "By combining an Internet Catalog with Advanced Order Online, clients can create a custom e-catalog that includes detailed product information and has the look and feel of that company's web site," she added.

The advent of custom e-catalogs allows participating manufacturers with distributors to receive and manage orders and define their own business rules.

Page 11

Orders can be routed to the appropriate distributor for fulfillment automatically by the buyer's zip code or the buyer can choose from a preexisting list. And, in companies with multiple divisions, each division can tailor its own Advanced Order Online catalog. Manufacturers can support their best customers online using Advanced Order Online to create private customer catalogs that are password protected and provide unique pricing and business rules.

Published by Thomas Register, Thomas Register Online ([www.thomasregister.com](http://www.thomasregister.com)) is one of the world's largest online resources of industrial and manufacturing information and business-to-business electronic commerce. Thomas Register lists more than 157,000 companies, 64,000 product headings, 7,800 online catalogs and weblinks, and 135,000 brand names. Thomas Register is available online at [www.thomasregister.com](http://www.thomasregister.com), in CD-ROM and in print. In 1999, Thomas Register was named one of the "The 100 Hottest Companies on the Net" by Business 2.0 magazine, CIO WebBusiness "50/50 Winner" and ranked in Business Marketing's "NetMarketing 200."

Headquartered in New York, Thomas Publishing Company is the leading provider of industrial product and service information through both print and electronic publishing. The pioneer of buying guides for all industries, Thomas has been bringing buyers and sellers together for the last 100 years. In addition to its website, the company publishes 24 major buying guides, 29 product newsmagazines, two product information exchange services, a magazine on factory automation, and publications to assist buyers in selecting the most cost-efficient transportation models.

**ThomasNet Launches Totally Internet-Based Version of  
SoluSource®:**

**Product Database for Manufacturing Engineers**

**-- Patent-pending "Find Other Ways to Do This" feature presents engineers  
with alternative solutions to engineering problems. --**

**NEW YORK, NY** (July 26, 2000) SoluSource®, ( [www.solusource.com](http://www.solusource.com) ), newly launched as a totally browser based product from ThomasNet Incorporated, enables engineers to find critical product information quickly and efficiently, while also identifying "alternative solutions."

Scott Emerich, General Manager of ThomasNet, said, "SoluSource organizes information from more than 16,000 product catalogs and thousands of manufacturers-and makes it available to engineers using a proprietary, patent-pending, 'intelligent' search engine. Finding new solutions based on product functionality can spark innovation throughout all phases of the design engineering process. SoluSource is the only tool of its kind to foster engineering creativity by dramatically enhancing engineering efficiency."

SoluSource's patent-pending functionality index takes searching beyond traditional methods, allowing engineers to literally ask the question, "How can I find other ways to do this?" Results from the "Find Other Ways to Do This" feature provide users with:

- Categories of possible alternatives,
- Specific product examples within those categories, with their related information, and
- A method for broadening search possibilities according to product function.

Engineers can search SoluSource® for electro-mechanical and mechanical devices using product descriptions, manufacturers' names, and even part numbers. Subscribers can select and view search results drawn directly from the manufacturers' catalogs by individual page, or even the unique specification tables, feature lists, images, schematics, or other pieces of available information relating to their search. SoluSource's all-online database alleviates the time consuming task of catalog acquisition and management for subscriber companies.

Engineers can be confident that the information provided in SoluSource is both complete and unbiased. ThomasNet's Emerich says, "SoluSource is constructed and indexed by our staff of engineers, and driven by the needs of our engineering customers-not by a supplier's need to 'move' a particular product. Our information is precise, industry-specific data that's updated daily, and our direction is backed by more than three years of testing and research into the needs of engineers in manufacturing environments. We are dedicated to delivering innovative tools that enhance the way engineers do their jobs."

SoluSource further offers subscribers:

- Ability to add approved vendors and designated suppliers as part of a basic subscription.
- Single-click access-from within the SoluSource interface-to the most recent industry standards, through a partnership with CSSINFO.
- Various subscription levels, from single workstation to enterprise wide solutions.

About ThomasNet:

Founded in 1995, ThomasNet Incorporated represents Thomas Publishing's continuing commitment to service industry through innovation.

**THOMASREGIONAL.COM AND  
MANUFACTURINGQUOTE.COM  
CO-BRAND THEIR LEADING INDUSTRIAL E-  
MARKETPLACES**

*-New Service - CustomQuote - Delivers E-Commerce Opportunities  
For Companies Buying and Selling Custom Manufacturing Services -*

**NEW YORK, - September 11, 2000** - Thomas Regional Directory Company, the leading online industrial marketplace serving the middle-market business community, today announced it has partnered with ManufacturingQuote.com, Inc. (Smyrna, GA) to create a new co-branded service delivering e-commerce RFQ opportunities for companies buying and selling custom manufacturing services. The service, called CustomQuote at [www.ThomasRegional.com](http://www.ThomasRegional.com), strategically combines Thomas Regional's e-commerce web site for industrial sourcing and purchasing with MfgQuote.com's innovative Web-based marketplace connecting suppliers and buyers of custom manufacturing services.

According to the U.S. Department of Commerce, custom manufacturing accounts for 17 percent of the gross domestic product and is on the rise. To serve this market, CustomQuote will integrate Thomas Regional's expansive database in the industrial supply community, with MfgQuote.com's exclusive Collaborative Procurement Management™ (CPM) system. MfgQuote.com's innovative CPM technology automates conventional procurement practices, streamlines the private quoting process, and creates a highly efficient e-marketplace for buyer-seller transactions and collaboration.

"CustomQuote provides an exciting new avenue of expanded e-commerce to the industrial community," said George Short, publisher of electronic products for Thomas Regional. "A great deal of industrial sourcing activity relates to requests for custom products - not off-the-shelf, commodity-type items. Our co-branded service combines ThomasRegional.com's active marketplace of buyers and sellers with the interactive and automated RFQ process provided by MfgQuote.com."

"Our partnership with Thomas Regional leverages the strengths of both companies to provide solution-level services that will set the standard in custom manufacturing

Page 15

e-procurement," said Mitch Free, president of ManufacturingQuote.com. "Because we serve a common audience, our collaboration on CustomQuote will transform traditional purchasing into a digital environment featuring greater automation and affordability, ease of use, and fast track procurement. The infrastructure of our technology has been designed to support future advancements and customer-driven enhancements."

Marketing, branding and selling by ThomasRegional.com will help generate additional e-commerce traffic for the MfgQuote.com service. The MfgQuote.com marketplace will receive requests for quotations (RFQs) posted both by Thomas Regional users as well as Thomas Regional's alliance channels. In a reciprocal arrangement, Thomas Regional will provide its industrial product and company information to ManufacturingQuote.com.

**About ManufacturingQuote.com, Inc.**

ManufacturingQuote.com, Inc. ([www.mfgquote.com](http://www.mfgquote.com)) is a privately-held Atlanta-area company that develops, markets and private labels the exclusive MfgQuote.com marketplace to a worldwide audience. ManufacturingQuote.com provides a non-auction procurement environment that is equally rewarding to buyers and suppliers. The Web site provides Collaborative Procurement Management tools allowing members to manage the business of procuring and selling custom manufacturing services such as precision CNC machining, molding, casting or rapid prototyping.

**About Thomas Regional**

Thomas Regional Directory Company ([www.ThomasRegional.com](http://www.ThomasRegional.com)) is a dominant online industrial marketplace and a leading provider of business-to-business information to the regional industrial communities of North America. Leveraging the power of the Internet, ThomasRegional.com enables industrial buyers to source, initiate and complete transactions quickly and easily online. Its flagship information products reach more than 1,500,000 industrial buyers - via the Web, CD-ROM and in print.

ThomasRegional.com provides company information on more than 520,000 middle-market industrial distributors, manufacturers and service companies in 6,000 product and service categories. In 2000, Thomas Regional.com was named as one of Forbes Magazine's "Best of the Web B2B Sites" and was also selected as one of Information Week's "Web Sites of the Week." Thomas Regional has been headquartered in New York City for more than 25 years.
